Advance Lithium Retains Net Smelter Royalty on Three Gold Claims in Kenya
Two Claims Bracket Shanta Golds' Isulu and Bushiangala Gold Deposits

Advance Lithium Corp. (TSXV: AALI) ("Advance Lithium" or "the Company") is pleased to announce that it has received written confirmation from Shanta Gold (AIM: SHG.L) that pursuant to the option agreement they have diluted Advance Lithium's ownership to below a 10% interest in the joint venture. Subsequently Advance Lithium now holds a 3% uncapped NSR on three exploration licences in Western Kenya.

Two of the claims are located on the Liranda Corridor, a key greenstone belt that is considered one of the most prospective regions for high-grade gold in Africa. These claims have seen significant historical colonial mining and current artisanal activity. Shanta Gold has the connecting licence where they have published a 43-101 compliant Inferred Mineral Resource of 1,182,300 ounces at 12.6 g/t Au¹ and recently hit bonanza grade drilling results. The Company feels that these two claims on which Advance Lithium holds an NSR, are highly prospective for the discovery of significant high-grade gold.

The third claim is to the north of the Liranda Corridor and hosts the Rosterman Gold Mine which operated in the late 1950s to the mid-1960s and mined seven gold bearing reefs from 23 underground levels.

Allan Barry Laboucan, President and CEO of Advance Lithium Corp. commented: "Now having a Royalty on these licences gives us more flexibility to leverage the inherent value in them. The 3% uncapped royalty has no right of first refusal which could allow us to sell a portion or all of the royalty. It is worth noting that in the past several years the gold royalty business has grown rapidly, yet the supply of royalties is tight. We will look at all opportunities to add value to the Company and reward our shareholders."

About Advance Lithium Corp.

Advance Lithium is a junior exploration company focused on acquiring and exploring mineral properties containing precious metals, battery metals and fertilizer minerals. The company acquired a 100-per-cent interest in the Tabasquena silver mine in Zacatecas, Mexico, in 2017, and the Venaditas project, also in Zacatecas state, in April, 2018.

In addition, Advance Lithium holds a 3% NSR on strategic claims in the Liranda Corridor in Kenya, East Africa. The remaining interest is held by Shanta Gold Limited (project previously owned by Barrick Gold Corporation, for details see Advance Gold News Release dated 2020-08-26).

In March 2020, the Company moved into the lithium space with a purchase agreement to acquire 13 lithium-potassium boron prospective salars in central Mexico, which also includes rights to a patent pending proprietary lithium and potassium extraction method.
